FOR IMMEDIATE RELEASE

Marshall Durbin implements CAT² Software Systems

January 9, 2006 --- (Conway, AR) – CAT² and Marshall Durbin announces CAT²'s selection as software vendor for Marshall Durbin's Hattiesburg and Jasper processing facilities.

Marshall Durbin will implement the CAT² production labeling and inventory system along with CAT² food safety solution, HAT. Both the Jasper and Hattiesburg facilities needed automated real time systems in order to respond faster to production and market changes.

The Hattiesburg plant processes 235,000 birds a day while the Jasper facility processes 195,000 a day.

"After a lengthy search, Marshall Durbin has selected CAT² to provide real time plant floor data collection and monitoring and inventory control systems for our plants and distribution center. We selected CAT² because of their excellent reputation for durability of equipment in a harsh environment and the robust software tools that will improve our operating coordination and efficiency that will ultimately translate into better quality and service for our customers," said Mark Jeter, CFO for Marshall Durbin.

Vernon Smith, vice president of CAT², said, "We are very pleased to be selected for the work at Marshall Durbin. We look forward to providing state of the art solutions to meet their processing needs."

About CAT²

CAT², a global software solutions company, provides software tools for the food industry in the areas of primary and further processing, food safety and commercial layers. For more information visit www.catsquared.com
